

Ultra Hygienic Handle

Vikan Setting New Standards in Security, Safety and Hygiene

Ultra Hygienic Design

All food companies are under pressure to maintain cleanliness in the production facility at all times - even during busy production.

As many food companies deal with a range of different ingredients, the avoidance of cross contamination and bacterial control is a key business driver. One of the greatest challenges

is to keep production facilities clean and organised at all times.

Vikan's Ultra Hygienic Handle is developed in close collaboration with customers, as they strive to improve their cleaning performance, raise standards of hygiene, and eliminate microbial and cross contamination issues.

- ✔ Prevention of food contamination incidents
- ✔ Compliance with auditor requirements
- ✔ Documented evidence of product quality and efficacy
- ✔ Prevention of product rejection or recall
- ✔ Compliance with FDA and EU food standard regulations
- ✔ Product choice security

Unique Features to Meet Industry Requirements

Vikan have worked extensively on developing the Ultra Hygienic Handle which improves efficient hygienic cleaning in the food industry.

The handle is made from EU and FDA compliant materials for use in the food industry. The smooth fully moulded components, makes it easy to clean and prevent bacteria buildup.

Avoid Foreign Body Contamination
